

The Emery/Weiner School

Designed by Bruce Coffman of touch thirty three, inc. (t33)

Installed by Emery/Weiner School Facilities Manager Terry Nelson

The Emery/Weiner School is a private, college-preparatory, Jewish middle and high school located in southwest Houston. The elite school prides itself in its experiential learning program and co-curricular traditional offerings, including dynamic arts and athletic programs. School facilities manager Terry Nelson engaged Houston design consultants touch thirty three, inc. (t33) to outfit their new football field with a sound system befitting the esteemed academic institution.

Challenges

While high output was required to fire up fans at homefield games, with high-end condominiums located just 22 feet behind each of the field's end zones, precise pattern control was also crucial to avoid "sonic intrusion" to residential neighbors.

Solution

t33 principal Bruce Coffman worked closely with Terry Nelson to create a new solution for the field's sound system after an initial spec with speakers mounted across the back of the bleachers was deemed ineffective. Coffman sent architectural dimensions to Fulcrum Acoustic co-founder Dave Gunness who ran EASE plots identifying a surprising single-speaker solution to cover the entire field and seating area. One Fulcrum AH463 High Efficiency Full-Range Coaxial Horn was mounted atop the field's 37 foot high scoreboard to provide the requisite SPLs for the crossfield acoustic throw and the precise 60° x 30° broadband pattern control to cover the grandstands exactly from end to end. Coffman concludes, "this was one of those very rare instances in which the right gear provided the absolute perfect match for the application. Beyond the bleachers and end zone, the sound virtually disappears. In addition to the school's savings realized by eliminating the need for additional speakers, the simplified installation cut the project's labor costs in half and helped make a very pleased customer with an exceptional sound system that exceeded their expectations."

Project Details

Location

Houston, Texas

Category

Sports (stadium)

Project Type

Private high school stadium

Fulcrum Product

(1) AH463 High-Efficiency, Full-Range Coaxial Horn, 60° x 30°

Supporting Products

Symetrix Radius DSP

Mystery Electronics EasyMix EM12 DSP Control Surface

Polar Focus Audio Rigging
